together

Jejo (jay-jo) is a fully independent IT Consultancy which works with manufacturing and service companies to improve their business efficiency through the use of computer technology. We specialise in creating cost-effective solutions for small to medium sized companies who wish to maximise the opportunities that today's technologies have to offer. From reviewing your existing systems to developing new ones to suit your needs, Jejo brings IT all together.
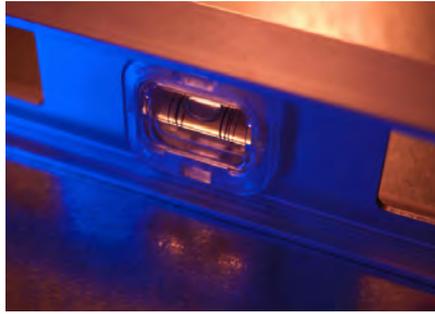

Who are we?

Jejo is a young company with mature skills. Headed by John Dickerson BSc (Hons) MBA MBCS. John has extensive experience as a business systems consultant, and combines far-sighted IT strategies with a practical hands-on approach. Jejo has provided IT solutions for many well-known companies including, Kimberly Clark, Siemens, and Price Waterhouse. John believes firmly in the importance of ensuring technology works both for the business and people. He is a Professional Member of the prestigious British Computer Society. Whatever the particular needs of your business, John, his team and network of highly experienced associates are ready to provide impartial and independent advice on a wide range of IT-related topics. It's like having your own IT department on call.

Making IT better

There are many procedures involved in running a business, some manual, some hi-tech, some straightforward, others more complex and time-consuming. We apply a number of techniques to analyse the effectiveness of your entire business systems, from simplifying procedures to developing completely new methods of working. The overall effect is the same – improved systems equals improved business efficiency.

✓ Business Process Design & Modelling

✓ Integrating Systems

✓ Database Development

Managing IT

Making the most of technology involves getting the technical experts to deliver tangible business benefits. We can give you independent and impartial guidance on choosing the systems and software that are right for you. And we'll deal with the supplier on your behalf to ensure that you get the best possible system for your needs – for the best possible business benefit.

✓ Project Management

✓ IT Outsourcing

✓ Business System Audit

Bringing IT together

You may already have several different computer systems in place that work perfectly well in isolation but not necessarily with each other. We'll help you make sure your systems link together in the most effective way, so that information flows smoothly in and out of your business – across departments, between customers and suppliers.

✓ Networking

✓ Systems Interfacing & Data Transfer

✓ Websites & e-Business

Keeping IT safe

Every business has insurance cover to protect staff, equipment and property – but how much cover do you have for your systems? It's vital that your business can continue to operate under any circumstances, and we can help make sure that it does. From a simple procedure for backing up your data to a full disaster recovery plan, we'll help you keep your business systems safe.

✓ Disaster Recovery & Backup

✓ Secure data

✓ Anti-Virus & Firewall protection

Some of our Successes

All our projects focus on business benefits – here are three very different examples.

✓ **100% growth in a small business**
Through simple-to-use computer technology, we helped a busy manufacturer automate a number of time-consuming administration and marketing functions.   Computerised stock management, 'mail shots' production, and invoicing helped the business to operate as if it was twice the size!

✓ **Top website**
We developed a fast loading website for our client and, through carefully researched and selected keywords, ensured it appeared at the top of the Internet search engine listings. It wasn't long before a major company got in touch, followed by a substantial order.

✓ **£thousands saved with one question!**
A client was looking for new accounting software. We put probing questions to a number of suppliers to ensure the system chosen not only met current needs but also could connect with other systems in the future. By considering the changing needs of the business, we helped our client avoid a costly mistake.

For more examples of our work, please see our website at www.jejo.biz.

How to contact us

Please contact us for a no obligation discussion about your company's systems, and how Jejo can help to improve them.

We look forward to hearing from you.
